## Philippe Starck takes *Volage EX-S* to the bedroom for a complete and timeless night-time experience

**Philippe Starck continues his creative journey with Cassina and presents a complete collection for the bedroom. *Volage EX-S Night* includes a bed fitted with an elegant headboard on which lighting and useful accessories are suspended, a bedside table, a chest of drawers, a compact sofa, armchair and bench, all featuring the same elegant and harmonious concept.**

*“Volage EX-S Night is timeless elegance, discreet elegance, human elegance.”* Philippe Starck.

### **The bed at the centre of our daily lives**

The bedroom is an **intimate place where everything revolves harmoniously around the bed**. Starck sees the bed as a city, a society, a civilization, where anything and everything happens: life, dreams, love and death.

The headboard of the *Volage EX-S Night* bed, available in two widths, features the same **distinctive quilted capitonné workmanship as the *Volage EX-S* sofa, where the traditional button has been replaced with an elegant stitch to accentuate the model’s gentle contours**. The padding is in different density polyurethane foam and 100% recycled fibre wadding produced from PET recovered from waterways or coastal areas in developing countries.

Each side of the headboard can feature a fused-aluminium bar **equipped with accessories to keep everything within reach**. A large pleated fabric lampshade diffuses warm light while a small dimmable LED spotlight can be pointed for reading. Two suspended bedside tables, with a wood or marble top, and a small wooden drawer offer sufficient space to keep useful items close to hand. The bed’s headboard is also equipped with an integrated USB and electric socket to always be connected.

Thanks to the work carried out by Cassina LAB, the collaboration between the Cassina Research and Development Centre and Poli.design at the Milan Polytechnic, the fabric padded bedframe can also be fitted with the Breath<sup>®</sup> purifying fabric. This is the first patented technology for zero-emission **air purification that captures and disintegrates pollutants to favour the natural circulation of clean air**. The fabric upholstered headboard also has a **sound absorbing panel** in Soundfil<sup>®</sup>, an ecological and recyclable, hygienic and non-toxic, sound-absorbing thermal insulator that contains and decreases the reverberation of surrounding sound frequencies.

A wide selection of **highly comfortable and ergonomic mattresses** together with a range of Cassina bedlinen and blankets complete the proposal.

### **Extra soft and versatile seating**

*Volage EX-S Night* is also available as a standard or large two-seater sofa and armchair with a 75cm depth making it **more compact and versatile for the bedroom or any other smaller space in the home**.

Its **timeless aesthetic** maintains the same quilted *capitonné* workmanship as the *Volage* family, with its **soft contours and contemporary stitching**, while this version has a single seat cushion and a very slim

# Cassina

armrest to provide more seating space. The distinctive aluminium frame has also been updated to match the rest of the *Volage EX-S Night* collection.

The armchair and sofa's seat, arm and backrest cushions are padded with expanded polyurethane foam and a 100% recycled fibre wadding, produced from PET recovered from waterways or coastal areas in developing countries; the seat cushion is also available in feather. Both options are founded on the **concept of extreme comfort**.

The *Volage EX-S Night bench*, featuring a deep and comfortable upholstered cushion, can be combined with the bed to complete the collection.

## Unique containers for a natural approach to storage

The *Volage EX-S Night* collection **combines and contrasts materials**, from its decisive and radical metal frame, featured throughout the collection, to its soft and warm finishes.

To enhance the natural atmosphere of the bedroom, Starck offers a **unique and elegant approach to storage**. Three containers of different heights, available in woven wicker or woven saddle leather, can be placed in the *Volage* glass **bedside table** redefining the concept of the traditional drawer.

A **combined lacquered or wooden chest of drawers** features six open compartments where larger woven baskets in wicker or saddle leather can be inserted; alternatively, it can be fitted with classic plush drawers with push and pull guides.
