

Mi MIX 2

Full Screen Display

Key specifications

- **Full screen display:**
 - Customized 18:9 screen with rounded corners
 - 5.99" display (when measured diagonally across)
 - 1.2% smaller chin than Mi MIX
 - Hidden sound guided speaker and ultrasonic proximity sensor
- **Mi MIX 2 design:**
 - 7-series aluminium alloy frame, four-sided curved ceramic body
 - 18k gold-plated camera rim
- **Mi MIX 2 Special Edition design:**
 - Four-sided curved ceramic unibody
 - Black version comes with 18k gold-plated camera rim
 - White version comes with 18k rose gold rims around camera & fingerprint sensor
- **Performance & storage**
 - Snapdragon 835, 10nm processor technology (Octa-core, max 2.45GHz)
 - Mi MIX 2 comes with 6GB LPDDR4x RAM + 64GB/128GB/256GB storage
 - Mi MIX 2 Special Edition comes with 8GB LPDDR4x RAM + 128GB storage
- **Camera**
 - 12MP rear camera:
 - Sony IMX386 camera sensor
 - 4-axis OIS, large 1.25µm pixels
 - Supports PDAF technology & low-light enhancement technology
 - Smaller front facing camera with super black lens coating
 - 5MP front camera
 - Beautify with 36 smart beauty profiles
 - Global LTE support, 6 modes 43 bands
 - 3400mAh high-capacity battery, full-day usage
 - 9V/2A Quick charge 3.0, USB Type-C charging
 - Multi-function NFC: Read, write, card emulation, and P2P
- **Dimensions:**
 - Mi MIX 2: 151.8 x 75.5 x 7.7mm
 - Mi MIX 2 Special Edition: 150.5 x 74.6 x 7.7mm
- **Weight:**
 - Mi MIX 2: 185g
 - Mi MIX 2 Special Edition: 187g

Full screen display, four-sided ceramic body

Mi MIX 2 brings to life what a full screen display should be - the physical form disappears into the background and on-screen content takes centerstage. An ultrasonic proximity sensor is hidden on the top surface, while the small front-facing camera fades away into the design even more with a new super-black coating around the lens. Even the physical earpiece speaker for phone calls is almost invisible, appearing as a tiny opening just above the display.

Mi MIX 2 has a beautiful ceramic back, which features a four-sided curved design which transitions smoothly into the aluminum frame, creating a beautiful finish that feels amazing in the hand.

Mi MIX 2 Special Edition takes it up a notch by debuting a ceramic unibody design. Manufacturing this unique back cover is an incredibly challenging production process of up to seven days, including sintering at 1400°C and over 10 hours of diamond polishing. The result is a beautiful, seamless design with a finish reminiscent of precious jade.

Snapdragon 835, up to 8GB RAM

Performance is key when enjoying content on a smartphone, and Mi MIX 2 more than delivers with the flagship Qualcomm Snapdragon 835 SoC, and up to 8GB RAM with the Mi MIX 2 Special Edition. With storage starting from 64GB and up to a massive 256GB, there's enough storage on Mi MIX 2 to suit every user's need.

Global LTE bands, 6 modes 43 bands

Mi MIX 2 is a truly global smartphone with a total of 43 cellular bands —the most we've ever offered. These allow use in markets with unique network requirements such as the U.S. 4x4 MIMO support enables blistering LTE speeds on supported networks.
