Lust for dust
Your mom probably excused herself to go powder her nose. Your version? Powdering your lips. Tinted lip powders glide on from the applicator like any gloss, then melt onto your mouth to create a sultry, saturated stain. Best part: You don't have to leave the party to reapply—the waterproof pigments last for hours. Try **Touch In Sol Chroma Powder Lip Tints** (\$20 each, sephora.com).

Scents that stir
When you recruit renowned designer **Philippe Starck** to create a line of fragrances, you know the bottles will be stunning (see exhibit A, right). But how will the actual scents stack up? As it turns out, all three—which evoke the fresh, mineral, and musky smells of clean, sexy skin—are just as exquisite. Starck **Peau de Soie**, **Peau de Pierre**, and **Peau d'Ailleurs** (\$150 each, neimanmarcus.com)

HAVE A BRUSH WITH GREATNESS
Grip the ergonomic **Artis Palm Brush** (\$65, artisbrush.com) in your hand, and you can blend foundation in a few quick circular motions, use one edge to contour your cheekbones with bronzer, or—a truly luxurious move—sweep lotion all over your body.
